

🧠 Browser Pilot – Extension Installation Guide

🚀 What is Browser Pilot?

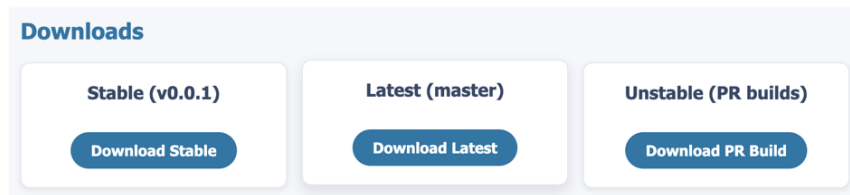

Browser Pilot is a smart browser assistant that helps you automate actions on your websites.

It appears as a floating chat widget in the bottom-right corner and allows you to type or speak natural commands.

📌 Step 1. Download the Extension

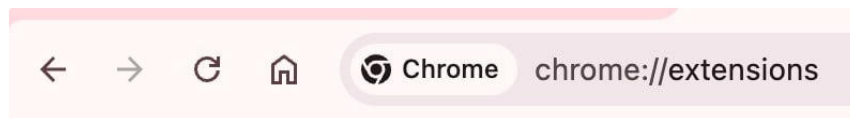

1. Download the latest release archive from the release page:

👉 [Download Browser Pilot Extension](#) or (<https://release.mysitepilot.ai/>)

💻 Step 2. Install the Extension in Chrome / Brave

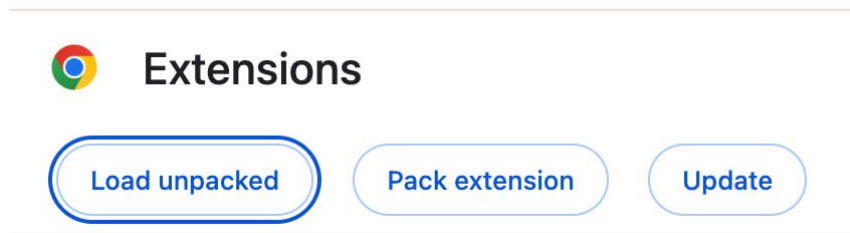

1. Open `chrome://extensions` (or `brave://extensions`).

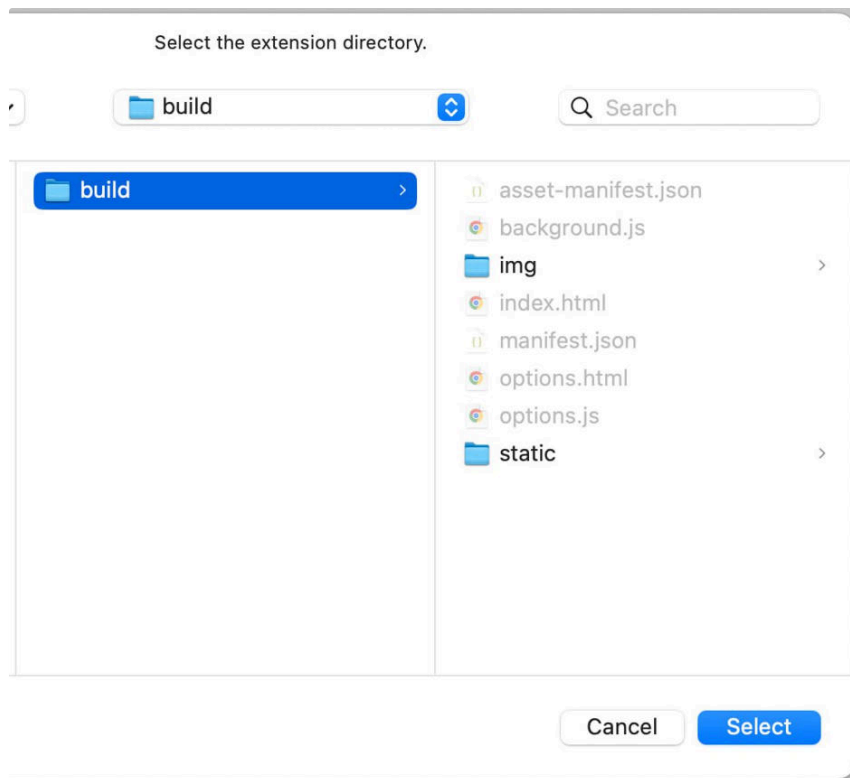

2. Enable **Developer mode** in the top-right corner.

3. Click **Load unpacked**.

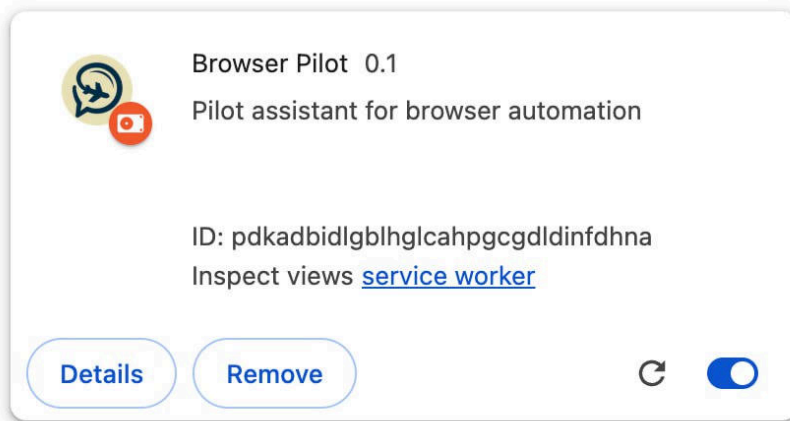

4. Select the `/build` folder from the downloaded archive.

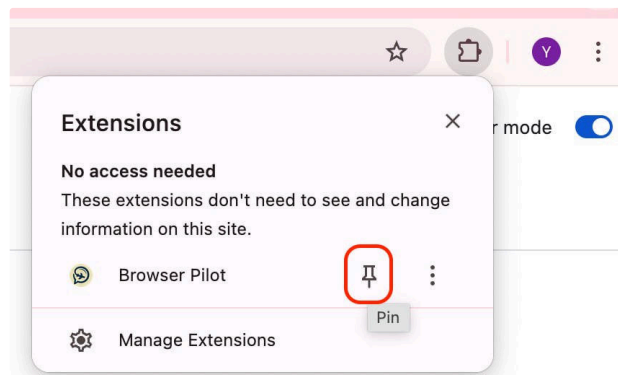

After this, you should have a new extension in your extension list.

All extensions

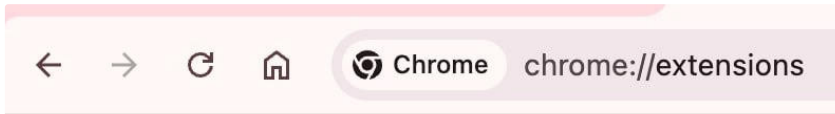

At the top right you can pin this extension for quick access.

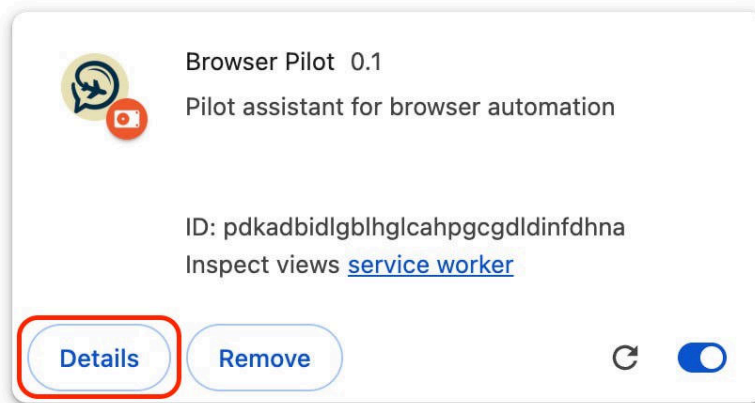

🔑 Step 3. Set Up Your API Token

1. Go to `chrome://extensions`.

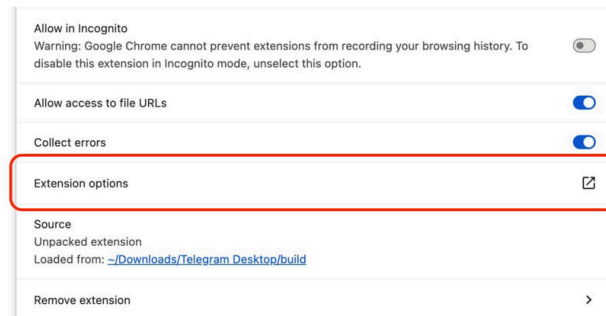

2. Click **Details** for *Browser Pilot*.

All extensions

3. Scroll down and click **Extension options**.

4. Enter your **API token**.

Browser Pilot Settings

Add Token

Paste API token

Label (e.g., DNAS / Demo / Dev)Env (prod/test/dnas/local)

Add / Update

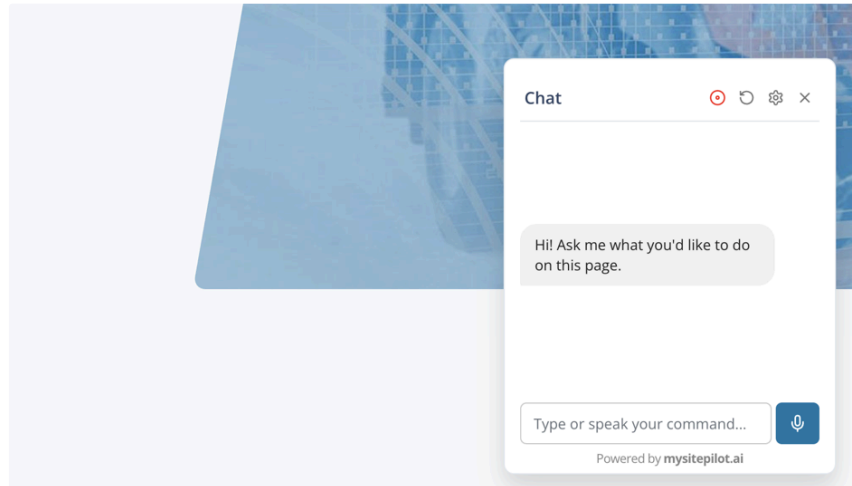

Label	Status	Allowed
No tokens yet. Add one above.		

5. Click **Add/Update**.

🎉 Done!

Now you will see a floating chat widget 🗨️ in the bottom-right corner of your site.

- Click the chat icon to open.
- Type a command or press the microphone 🎤 to speak.
- The assistant will perform the requested actions directly on your site.

📦 (Optional) Embedding the Widget Without Extension

If you prefer not to use the extension, you can embed the widget directly:

```
1 <head>
2   <script>window.MSP_TOKEN = "your-token-here"</script>
3   <link
4     rel="stylesheet"
5     href="https://widget.mysitepilot.ai/release/latest/chatbot.css"
6   />
7 </head>
8 <body>
9   <!-- Your website content -->
10  <!-- Place the widget script at the end of <body> -->
11  <script
12    src="https://widget.mysitepilot.ai/release/latest/chatbot.js">
13  </script>
14 </body>
```

✅ Summary

1. Download the extension
2. Install it in Chrome/Brave
3. Enter your token
4. Start chatting with the assistant 🎉
